

SUNIL KUMAR BISHNOI

GRC-Focused Cybersecurity Professional | Cybersecurity & Networking Student

Vadodara, Gujarat, India | sunilkbishnoi83@gmail.com | +91 9687055205 | [LinkedIn](#) | [GitHub](#) | [TryHackMe](#)

SUMMARY

Final-year Computer Science Engineering student specializing in Cyber Security and Networking (CGPA 8.25/10) at ITM (SLS) Baroda University, transitioning into Governance, Risk & Compliance (GRC) with a continued focus on cyber defense. Currently completing a Cybersecurity Internship at iSecurify (under Allianz Cloud Pvt. Ltd.), supporting security monitoring, incident handling, VAPT, and documentation of IT/security processes, with growing exposure to compliance-oriented tasks. Solid grounding in networking and IT fundamentals, with working familiarity with ISO/IEC 27001 and NIST CSF gained through coursework and self-study, and currently studying the Digital Personal Data Protection (DPDP) Act, 2023. Combines this with hands-on technical security skills (Kali Linux, Wireshark, Burp Suite, Nmap, SIEM). Comfortable bridging technical security findings with clear documentation and reporting for governance and risk purposes.

SKILLS

GRC & Documentation: Security Process Documentation, Policy & Procedure Support, Incident Handling, Audit Support (exposure), Risk Reporting, Compliance Evidence Support

Frameworks & Regulations (Working Knowledge): ISO/IEC 27001, NIST CSF, OWASP Top 10 — via coursework, certifications, and self-study; currently studying the Digital Personal Data Protection (DPDP) Act, 2023

Networking & IT Fundamentals: TCP/IP Networking, OS Fundamentals, Cyber Hygiene, IT Security Basics (TryHackMe Pre Security)

Security Operations: VAPT, SIEM, OSINT, Endpoint Security, Digital Forensics, Firewall Configuration, Cryptography, Kali Linux, Wireshark, Burp Suite, Nmap

Programming: Python, Java, C, JavaScript/TypeScript, Bash, Kotlin, SQL/DBMS

Tools & Frameworks: React.js, Tailwind CSS, Git/GitHub, Docker, Figma, VirtualBox

PROFESSIONAL EXPERIENCE

Cybersecurity Intern

June 2026 – August 2026

iSecurify (under Allianz Cloud Pvt. Ltd.), Vadodara, Gujarat — Reporting to: Rahul Joshi, CTO

- Support security monitoring, incident handling, and real-time threat response using SIEM and endpoint security tools.
- Conduct Vulnerability Assessment and Penetration Testing (VAPT), reconnaissance, and findings reporting.
- Contribute to documentation of IT/security processes and assist with compliance-related recordkeeping alongside ongoing cybersecurity R&D projects.
- Assist with GRC-adjacent tasks including process documentation and support for audit and policy adherence activities.
- Operate under strict adherence to NDA, IT Security Policy, and Code of Conduct in an enterprise environment.

SELF-DIRECTED LABS & PROJECTS

Self-Directed Cybersecurity Labs & Projects

2024 – Present

- Built and maintained home labs with Kali Linux, Linux Mint, and Windows (VirtualBox) for penetration testing, network traffic analysis, and digital forensics.
- Active participant in Capture the Flag (CTF) events and platforms like TryHackMe (e.g., MBR/GPT forensics rooms).

Selected Projects

- OSINT-Sleuth (Python) — Cross-platform username reconnaissance and availability-checking tool for OSINT gathering.
- Terminal-Based Portfolio (TypeScript / Tailwind CSS) — Interactive command-line style personal website, featured on DEV.to.
- Stream-UPI-Goal-Updater (TypeScript + Browser Extension) — Real-time UPI donation tracking, goal updates, alerts, and overlays for streamers.
- Hand Gesture Mouse Control (Python) — Computer vision-based gesture recognition system.

- GhostShell-Baby (Python) — Simulated cyber-operations learning environment for ethical intrusion scenarios.
 - Additional tools: Recon-tool, Privacy-Guardian (Kotlin), Secure File Sharing, Cyber-Auth Website.
-

CERTIFICATIONS

- Pre Security Learning Path — TryHackMe (July 2026)
 - Basic Cyber Security & Hygiene — “Cyber Smart”, Indian Cyber Crime Coordination Centre, Ministry of Home Affairs (July 2026)
 - Google Cybersecurity Professional Certificate — Coursera (July 2024)
 - Cybersecurity for Everyone — University of Maryland, Coursera (June 2024)
 - Introduction to Networking — NVIDIA, Coursera (June 2024)
 - Docker — ScholarHat (March 2025)
 - Git & GitHub — LetsUpgrade (March 2025)
 - SQL Basics — Newton School
 - Java Object-Oriented Programming — LinkedIn Learning
 - Database Foundations: Intro to Databases — LinkedIn Learning
 - Introduction to CIP — OPSWAT Academy
 - H4CKP13T 0X01 — CTF Participant
-

EDUCATION

B.Tech in Computer Science Engineering — Specialization in Cyber Security and Networking2023 – 2027

ITM (SLS) Baroda University, Vadodara, Gujarat — CGPA: 8.25/10

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Networking, Database Management Systems, Web Technologies, Ethical Hacking

ADDITIONAL INFORMATION

- Languages: English (Professional Proficiency), Hindi (Native)
- Interests: GRC, cyber defense, cybersecurity research, threat mitigation, secure software development, CTFs, technical blogging
- Online Presence: Active on LinkedIn and DEV.to sharing labs, tools, and learning journeys
- References: Available upon request
